**plan b SEA-AIR solution**  
designed for air-cargo importers of high volumes

*For importers who ship high volumes of air freight from Vietnam, we know your peak-season headaches.*

AGS offers **Plan B: Sea-Air** Service as a cost saving solution during peak seasons, when air cargo space is tight, backlogs and peak-season surcharges occur.

#### Service values:

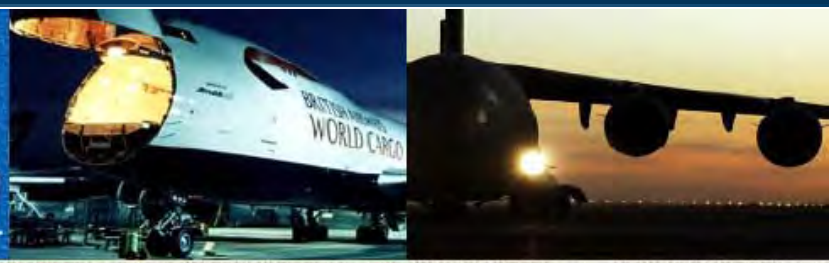

- Saves up to 50% over regular ocean transit time
- Priced at significantly lower rates than air freight rates during peak seasons
- Adds options to your logistics plan
- Helps your freight cost management depend less on air freight market price, which fluctuates significantly between seasons
- No more backlog headache: Since the Vietnamese government only allows carriers to consolidate air cargo in the government's facilities, which have very limited space, heavy backlogs occur every peak season. By moving your freight with our "Plan-B" Sea-Air service, your freight will be moved as sea freight initially, then be moved by airfreight to the final destination. Through this method we will be able to load your freight at our own warehouses and avoid seasonal backlog problems.

We route sea-air shipments as sea freight from Hai Phong and Ho Chi Minh seaports to Taipei, Singapore, Seoul, or Dubai, then as air freight into your airport of choice in the United States.

Sea-Air service is priced at rates per kilo, just like regular air service.

Please contact us at [vietnam@agsystems.com](mailto:vietnam@agsystems.com) or 1-800-660-4685 for more information.
